

CAN BARAN GÜNDÜZ

COMPUTER ENGINEER //

SUMMARY

I'm looking for business opportunities to contribute to the IT sector and the company. I want to work for people which makes great solutions for everybody. What I'm doing is being open to new things that broaden my horizons for web technologies in NODEJS Runtime including Express and other things projects and also I keen on game programming on Unity. Some improvements are messenger of the new generation which has no fear to try brilliant ideas. So I'm trying to develop my skills day by day. Learning is endless river and I'm swimming decisively on its direction.
